Configuration stapling / nailing machine

Company:		Telephone:	
Street:		E-mail:	
ZIP / City:		Department:	
Country:		Project:	
Name of contact:			

Please fill out the questionnaire according to your information.
 Not all fields need to be filled out.

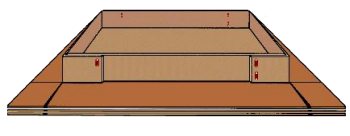

A) Category

<input type="checkbox"/> Stapling Material 1  Material 2	<input type="checkbox"/> Nailing Material 1  Material 2
--	---

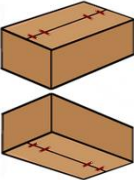

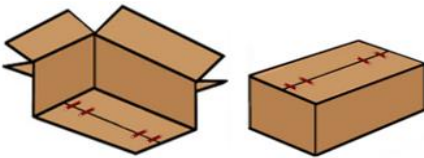

B) Material

Material 1:	<input type="checkbox"/> Carton	<input type="checkbox"/> Plastic	<input type="checkbox"/> Wood	<input type="checkbox"/> Others:	
Material 2:	<input type="checkbox"/> Carton	<input type="checkbox"/> Plastic	<input type="checkbox"/> Wood	<input type="checkbox"/> Others:	
<input type="checkbox"/> Solid board		If known, indicate strength or FEFCO No.			
<input type="checkbox"/> Single corrugated board					
<input type="checkbox"/> Double corrugated board					
<input type="checkbox"/> Triple corrugated board					
Material thickness:	Material 1 (mm):		Material 2 (mm):		
<input type="checkbox"/> Staple position/s  Sketch with indication of staple position/s; for each size one sketch under point P. (Please send pictures and samples!)					

C) Version

<input type="checkbox"/> Folding boxes 	<input type="checkbox"/> Telescope cartons 	<input type="checkbox"/> Cardboard trays 
<input type="checkbox"/> Other cardboard boxes (please define exactly under P) or/and insert pictures		<input type="checkbox"/> Other articles (please define exactly under P) or/and insert pictures

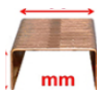

G) Workflow

Process			Comment
<input type="checkbox"/> Unfold cardboard	<input type="checkbox"/> manual	<input type="checkbox"/> automatic	
<input type="checkbox"/> Fold carton bottom	<input type="checkbox"/> manual	<input type="checkbox"/> automatic	
<input type="checkbox"/> Filling the carton	<input type="checkbox"/> manual	<input type="checkbox"/> automatic	
<input type="checkbox"/> Fold carton lid	<input type="checkbox"/> manual	<input type="checkbox"/> automatic	
<input type="checkbox"/> simultaneous bottom and lid closure of the filled folding box 	<input type="checkbox"/> first close the bottom of the empty folding box, then fill the folding box then close the lid of the filled folding box 		<input type="checkbox"/> Define other sequence under P)

H) Staple material/size

Material: Steel, copper plate Steel, galvanised Stainless steel other: _____

Crown size: 9 mm For stapling and nailing 13 mm For stapling and nailing 20 mm For stapling and nailing 36 mm For stapling other: _____

I) Number of staples

pcs. per Bottom Top Flap Side other: _____

J) Working capacity/cycle number

Quantity: _____ pcs. per minute hour other: _____

K) Design

<input type="checkbox"/> mobile	<input type="checkbox"/> fix location
<input type="checkbox"/> free-standing	<input type="checkbox"/> integrate into existing line (please specify)

L) Degree of automation

<input type="checkbox"/> mechanical version (manual)
<input type="checkbox"/> Semi-automatic (manual insertion/removal) (pneumatic or electro-pneumatic version)
<input type="checkbox"/> Fully automatic operation (electro-pneumatic version)

M) Adjustment to other sizes

Article sizes come: chaotically in series _____ pieces
 (different sizes one after the other (same size one after the other))

Stapling machine should be adjusted to the different sizes:

<input type="checkbox"/> manuell _____ x per	<input type="checkbox"/> shift	<input type="checkbox"/> day	<input type="checkbox"/> other: _____
<input type="checkbox"/> automatic
